

## Vision Benefits by Role

### For Accounting

Your Accounting team has little time to spare and our tasks need to be completed accurately and quickly. Deltek Vision can help you address these accounting challenges.

#### Access important Data

**Do project and executive managers run to you every time they need a report?**

Vision puts up-the-minute project, financial and business information at the manager's fingertips from anywhere, anytime, which leaves accounting more time to focus on other mission-critical tasks.

**Vision empowers your managers to access important data:**

- Web-based architecture
- User-specific or role-based dashboards
- Targeted, configurable reports with drilldown
- One database for all critical business processes

#### Project Time & Expense

**Do you have billing problems?**

Vision helps eliminate the leakage of billable time and expense and captures it to the level of detail that supports project and budget management and contractual requirements. Project invoices are accurate the first time, which shortens the billing cycle and time to payment. With targeted AR aging reports and aging Alerts, the team can stay on top of the collections process helping you get paid more quickly.

**Vision helps you capture all project time and expenses, bill them on time and ensure prompt payment:**

- Time and Expense Collection, with approvals
- Configurable WBS, billing terms and invoice formats
- AR Aging reports
- Workflows
- Alerts
- Dashboards

## Automated Process

**Can your accounting and billing systems handle all of your tasks?**

The Vision Accounting and Billing feature-set will meet the most demanding requirements of the project-focused firm, which eliminates the need to use work-arounds and outside systems.

**Vision automates all your accounting processes with stringent internal controls:**

- Complete financial management and project accounting system, including time and expense collection, billing, financial reporting, general ledger, accounts payable, accounts receivable, payroll, purchasing and inventory
- Multi-currency, multi-company, intercompany billings and transfers and other advanced accounting features
- Workflows
- Dashboards
